Racemi Among "Top 10 Storage Start-ups to Watch"

ATLANTA, February 22, 2008 – Byte and Switch has named Racemi to its quarterly list of the "Top 10 Storage Start-ups to Watch." The list recognizes companies that demonstrated leadership and met the following criteria:

- A really interesting gamble or a creative take on an important storage or storage-related problem;
- Current impact, demonstrated in getting new funding, launching new products, or adding significant partnerships sometime within the last 18 months;
- Solid initial backing in the form of an angel round, spinoff support, or an official venture round;
- Partnerships, customers, or contracts in place that prove they're more than vaporware.

"We're pleased by this important recognition of our company and our DynaCenter product line. DynaCenter enables companies to really take advantage of networked storage and solves key business challenges in the data center, including server recovery and consolidation," said Richard Stansbury, CEO of Racemi. "We are excited about the growth path for the company as a key component of the next generation of data center automation and efficiency."
