Racemi selected to Present at Technology Association of Georgia

ATLANTA, April 22, 2008 – Racemi's Chief Strategy Officer, Brian Hoffman, will be making a presentation on DynaCenter, the company's flagship technology, at next week's Technology Association of Georgia (TAG) meeting. The presentation will be held at the Georgia Tech ATDC Center at 85 5th Street in Atlanta on April 29 at 7pm.

Hoffman will discuss the business challenges around disaster recovery, and how those are compounded by today's typical data center running multiple disparate systems. He will explain how Racemi technology is able to address these challenges, as well as the company's vision for the future.

The audience is expected to include some 75 of Georgia's leading CIOs and IT executives who select companies and topics based on their most significant challenges and business initiatives. Racemi was specifically selected to present how their image-based mobility enables a more cost effective approach to disaster recovery.

More information on this presentation and event registration is available here: www.tagonline.org/connectga.php.

About Racemi

Racemi, a virtualization company, provides a next-generation server imaging and migration technology, delivering the broadest platform support and price-performance in the industry. With built-in support for physical and virtual migration, disaster recovery, and image capture and deployment across dissimilar hardware, Racemi provides simply more.
