Blackhawk Technology Becomes Racemi Reseller

ATLANTA, October 16, 2007 – Racemi, Inc. announced today that Blackhawk Technology Consulting has joined Racemi's Authorized Partner Program as a certified reseller and services provider. With access to DynaCenter®, which enables virtualization across all technology domains, the Racemi Authorized Partner Program offers Blackhawk Technology access to products, training, sales, marketing and technical support for immediate short-term revenue opportunities.

Lorraine Bassett, vice president of channel development for Racemi, said, "Blackhawk is one of the leading innovators in the data center consolidation and virtualization space, so we're delighted to bring them on as a reseller and to expand their service portfolio to their core base of customers."

Comments Ty Schwab, senior consultant and CEO of Blackhawk, "The virtualization and data center optimization markets are exploding with opportunities. We're very impressed with Racemi's platform and are confident our customers in education, financial services, government and healthcare will find it indispensable as they throttle forward their efforts to add certainty to their data center operations."

Racemi helps enterprises create, manage and optimize next generation data centers with technology, tools and processes that offer maximum flexibility, achieve the lowest total cost of ownership and minimize risk. DynaCenter provides optimum mobility by allowing enterprises to take applications running on one server and easily move them to another server with hardware which may be dissimilar. Completely scalable, DynaCenter can take applications running on hundreds or thousands of servers with different operating systems and move them to new hardware within a data center or at a geographically distant location as fast as a warm boot.

About Racemi

Racemi provides certainty to enterprises seeking to optimize data center operations by maximizing the utilization, reliability, agility and cost-effectiveness of their IT assets. DynaCenter®, the company's flagship systems management software solution, is ideal for alternative use of idle

disaster recovery assets, data center relocations, lab and test environments, managed hosting and utility computing. For more information, visit www.racemi.com.

About Blackhawk

Blackhawk Technology Consulting is a unique and diverse group of IT professionals with a very distinct competency and expertise within the emerging technology and virtualization field.
