Racemi Joins The BladeLogic Data Center Alliance Program

-Unified solution provides on-demand provisioning, rapid recovery and configuration management to streamline operations and increase server utilization-

ATLANTA, October 22, 2007 – Racemi, Inc. today announced it has joined the BladeLogic Data Center Alliance program. Through the partnership, Racemi and BladeLogic (Nasdaq: BLOG) will provide both enterprise and service provider customers with the ability to dynamically provision, configure and easily move physical and virtual servers and applications across platforms. The combination of the two technologies allows IT organizations to optimize key server and application management processes such as disaster recovery, data center consolidation and ongoing configuration management.

“BladeLogic is a clear leader in the data center automation market. We are pleased to combine our respective technologies and expertise to bring highly valuable and integrated data center optimization solutions to the market,” said Richard Stansbury, CEO of Racemi. “Working jointly together, BladeLogic and Racemi offer an ideal opportunity for companies to transform their data centers into seamless, fully automated, highly utilized operations.”

BladeLogic’s suite of data center automation software solutions enables IT organizations to manage, control and enforce configuration changes to servers and applications in order to realize maximum value from the data center. DynaCenter®, Racemi’s flagship systems management software solution, is ideal for alternative use of idle disaster recovery assets, data center relocations, lab and test environments, managed hosting and utility computing.

“We are very pleased to partner with Racemi, a leader in data center optimization solutions and technologies, and include them in our Data Center Alliance program,” said Vance Loiselle, vice president, marketing, BladeLogic. “BladeLogic is focused on providing customers a fully-integrated, best-of-breed management platform for their data center infrastructure. Our joint offering highlights the architectural benefits of both companies to empower

IT organizations to align their physical and virtual server infrastructure with their business objectives.”

About Racemi

Racemi provides certainty to enterprises seeking to optimize data center operations by maximizing the utilization, reliability, agility and cost-effectiveness of their IT assets. DynaCenter®, the company’s flagship systems management software solution, is ideal for alternative use of idle disaster recovery assets, data center relocations, lab and test environments, managed hosting and utility computing.
