Racemi Adds cenergyIT to Authorized Channel Partner Program

ATLANTA, July 2, 2007 – Racemi, Inc. announced today that cenergyIT, a technology solutions and services firm, has joined Racemi's Authorized Partner Program as a certified reseller and services provider. With access to DynaCenter®, which enables virtualization across all technology domains, the Racemi Authorized Partner Program offers cenergyIT access to products, training, sales, marketing and technical support for immediate short-term revenue opportunities.

Lorraine Bassett, executive director of channel development for Racemi, said, "With its background in data center operations, management, migrations and disaster recovery planning, cenergyIT is an ideal partner for Racemi. With full access to our DynaCenter technology, cenergyIT will be able to offer its clients a means to dramatically improve the performance of their data centers, fully leveraging its current IT assets."

Haywood Pulliam, CEO of cenergyIT, said, "We are seeing substantial interest from our clients for automation technology that helps improve recovery time objectives, reduces costs associated with data center migrations, improves application availability and enables processing on demand. DynaCenter meets all of the functional requirements our customers have been seeking, so we are pleased to work with Racemi. This product will truly revolutionize the way companies think of disaster recovery and asset reallocation."

Racemi helps enterprises create, manage and optimize next generation data centers with technology, tools and processes that offer maximum flexibility, achieve the lowest total cost of ownership and minimize risk. DynaCenter provides optimum mobility by allowing enterprises to take applications running on one server and easily move them to another server with hardware which may be dissimilar. Completely scalable, DynaCenter can take applications running on hundreds or thousands of servers with different operating systems and move them to new hardware within a data center or at a geographically distant location as fast as a warm boot.

About Racemi

Racemi provides certainty to enterprises seeking to optimize data center operations by maximizing the utilization, reliability, agility and cost-effectiveness of their IT assets. DynaCenter®, the company's flagship systems management software solution, is ideal for alternative use of idle disaster recovery assets, data center relocations, lab and test environments, managed hosting and utility computing.
